

Jenkins installation end to end

- 1) First launch instance
- 2) Connect through ssh link
- 3) Now follow commands

```
sudo apt update
sudo apt install fontconfig openjdk-17-jre
```

```
java version
```

```
sudo wget -O /usr/share/keyrings/jenkins-keyring.asc \
https://pkg.jenkins.io/debian-stable/jenkins.io-2023.key
```

```
echo "deb [signed-by=/usr/share/keyrings/jenkins-keyring.asc] \
https://pkg.jenkins.io/debian-stable binary/ | sudo tee \
/etc/apt/sources.list.d/jenkins.list > /dev/null
```

```
sudo apt-get update
sudo apt-get install jenkins
```

- 4) Go to your instance
- 5) Click on security
- 6) select security group
- 7) Edit inbound rules
- 8) add rule
- 9) Port range =8080. Source type = Anywhere IPv4
- 10) save rule
- 11) Now copy instance public IP address
- 12) Paste it on chrome tab
- 13) add :8080 after IP address
- 14) it will give /var..... Path
- 15) copy it and run this command in instance

```
sudo cat /(Paste the path here)
```

- 16) Copy output and go to Chrome and paste it as password
- 17) Now create an user and continue
- 18) Now select install recommended plugins

That's it !
Jenkins is successfully installed
